

Extrusion Laminator

DYE-1000

Features

- > High extrusion output.
- > Excellent, stable melt temperature.
- > Special adapter enables pressure adjustment.
- > Superior profile control; fast, easy decal width change.
- > Auto bobbin changer and auto tension control.
- > Unwinder features auto tension control and auto edge control.
- > Excellent cooling efficiency of rolls.

Specifications

Model	DYE-1000
Laminating Method	Sandwich or Single Laminating
Unwinding Unit	2-Shaft Electric Turretting with EPC
Max. Dia of Wind-up Roll	ø600, ø800, ø1000 m/m
Max. Width of Substrate	1,500 m/m
Heat Capacity (approx)	30 - 120 kW
Laminating Unit	AC 7-1/2 HP - 10 HP
Winding Unit	2-Shaft Electric Turretting with Tension Controller
Winding Dia	ø800, ø1000 m/m
Machine Speed	150 m/max
