

Nine Color Rotogravure

DYM-9100

Printing Machine with Individual Motors

Features

- > Automatic left / right color control, precision pre-registration.
- > Automatic electronic tension control on unwinder/ rewinder.
- > Electric blower uses closed convection system.
- > Main machine uses independent motion for convenient, fast and accurate coloring while reducing waste.
- > Pneumatic shaftless device to facilitate changeovers and reduce labor.
- > Auto electric motion, pneumatic cutter, uniform vibration for the ultimate in accuracy and beauty.
- > Automatic inverter rack for improved printing.

Specifications

Model	DYM-9100
No. of Colors	2 - 9 Color Printing
Web Type	Flexible Plastic Films (Fiberglass, OPP, PE, PP, PVC aluminum foil, cartons, paper rolls, etc.)
Max. Web Width	1000, 1200, 1500 mm
Printing Roll Width	1100, 1300, 1600 mm
Machine Speed	0-250 m/min max
Drive	AC inverter motor drive and AC servo; frequency, PLC and tension control. Material in/outfeed and winder with magnetic brake on coiler.
Dia. of Unwinder & Rewinder	ø800 mm Paper Core (ID) ø76 mm (ID) ø95 mm
Power	220V, 380V, 415V, 440V 50/60 Hz

Applications

- > Printing of fiberglass, OPP, PE, PP, PVC aluminum foil, cartons, paper rolls, etc.
